WORK EXPERIENCE

Full-Stack Developer
Oct 2025 – Present

Bit Concept Co., Ltd.

- Built core modules end to end: workspaces, companies, roles and permissions with Google sign-in, assets, check sheets (scheduling, QR scan, XLSX export), spare parts, and repair jobs.
- Designed the notification engine (check sheet and repair job events, email, in-app center, per-channel preferences) and a reusable audit-log layer used across the platform.
- Created shared UI components (sidebar, tables, signature input, date pickers) and dashboards used by both the tenant and admin apps.
- Designed CI/CD automation that generates and publishes TypeScript API types from OpenAPI specs, plus pipelines for validation, typechecking, testing, linting and npm publishing; collaborate with a US-based frontend team on API contracts.
- Use Claude Code as a supervised assistant for scaffolding; I review and own every change.

Frontend Developer
Feb 2024 – Sept 2025

Digithun Worldwide Co., Ltd.

- Contributed to ShopScape — a multi-tenant e-commerce platform powering storefronts for Yuedpao, SE-ED, Reeeed, and 365BeautyClub (Super Admin, Seller, Buyer apps).
- Engineered a drag-and-drop CMS homepage/footer builder using React Context and Elastic UI with a Draft/Commit workflow ensuring data integrity before deployment.
- Architected an XLSX import/export pipeline using ExcelJS with per-row error mapping, client-side pagination, and streaming reports for bulk data operations.
- Built a real-time Zortout (ERP) sync UI using ReadableStreams for live progress updates and two-phase cancellation.
- Developed analytics dashboard with Recharts, custom date-range pickers with previous-period KPI comparisons, and SWR-keyed caching.
- Implemented Feature Flags for incremental rollout of AI Search and delivery discount modules; standardized form handling with Dirty State Guards via lodash.
- Integrated configurable CDP tracking gated by cookie consent; implemented JSON-LD for SEO-structured product and blog data.

Frontend Developer
Sept 2022 – Jan 2024

Bluewind Solution Co., Ltd.

- Built responsive web interfaces for an ASP.NET MVC enterprise application using HTML5, Bootstrap, JavaScript, and jQuery.
- Integrated REST API and AJAX calls for dynamic data exchange; reduced page load times through asset and DOM optimization.
- Collaborated with the backend team on API contracts and iteratively improved UX across multiple enterprise modules.
